Summary

I am a student at Daffodil International University studying Computer Science and Technology (CSE). As I am passionate about computer technology, every day I try to learn about new technology and staying up to date with the current tech world. New software and apps fascinate me with the innovative way of problem solution.

As I am interested in software and website development, I have learned Object-Oriented Program (OOP). I have mastery in HTML, CSS, PHP, Laravel. I am also expert at Microsoft Office.

I aspire to open my own IT farm in 15 years. The farm will be a place for passionate people like me to pursue my goal to present the world with something new and useful.

For leisure period, I mostly learn new programming languages and read articles about new software technology. I enjoy playing online games and occasionally siting with my guitar and relax for the moment.
